

SAFETY AND HEALTH POLICY

J & S Drilling is committed to ensuring the safety and health of their employees. We will work safely in an environment that promotes the health and well being of all employees.

In support of this policy, management will make every effort to prevent accidents, through the identification and elimination of workplace hazards and the promotion of safety awareness among their employees and contractors.

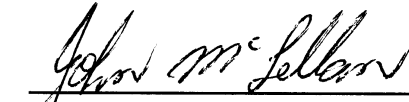

J & S Drilling will abide by all statutory Acts and Regulations as a minimum standard and will strive to maintain a level of safety that continues to improve on the legal requirements.

To consistently achieve this aim, it is essential that;

- All personnel are correctly inducted prior to commencing any work,
- Supervisory personnel understand and accept their responsibility for preventing injuries to employees they supervise under their Duty of Care,
- All employees accept their responsibility to work safely and to extend this concern to other employees under their Duty of Care,
- All employees to use appropriate Personal Protective Equipment,
- Equipment is properly maintained, operated and routinely checked to ensure compliance with safety and health requirements,
- Safe Work Procedures and Job Safety Analyses are developed for all significant tasks and emergency procedures are identified,
- Accidents and incidents are reported and investigated and recommendations made to prevent their recurrence,
- Employees attend company sponsored training programs and inductions, on an ongoing basis.

J & S Drilling encourages participation in all matters affecting the safety and health of our employees and invite suggestions from our work force of ways in which safety can be improved.
